

KPU Electric Division Conservation Tip #6

Weatherizing Your Home Can Save You Money! Replace Those Leaky Windows!

Windows can be one of your home's most attractive features. Unfortunately, heat transfer through windows can also account for 20% of your heating bill. There are a number of great reasons to consider installing replacement windows in your home. Besides reducing your heating bills new windows will keep noise out and comfort in while adding beauty and value to your home. Vinyl windows are easy to install and require little maintenance. While the initial cost of replacing the windows of your house can be intimidating, it doesn't take very long to realize just how quickly your replacement windows pay for themselves.
