

## KPU Telecommunications

How to:

Program your Replacement Myrio Remote to your TV Set

Or

Program your existing Myrio Remote to a new TV Set

1. Make sure your TV set is powered ON.
2. Push the "TV" button and hold it. The little red light will blink once.
3. Push and HOLD the "Setup" button. Light will blink two times.
4. Push the numbers "9 9 1." Light will blink two times.
5. Push the number "1." Light will blink two times.
6. Now push the following combination repeatedly until the TV turns off:  
Push "Power" then the Channel button "+"; repeat until the TV turns itself off. This could take up to 40 repeats, although it usually will not take that many.
7. After the TV turns off do the following:  
Push the "Setup" button. The red light will blink twice.

You are done. Your remote is now set to your TV set.

Note: It will only work on the TV set for which you programmed it.
